

RESUME

Name: George Mwaura Njau

Role: Software developer

Phone Number: +254 713 096 423

Email Address: gnjau652@gmail.com

Location: Nairobi

GitHub URL: <https://github.com/jijonjau>

LinkedIn URL: <https://www.linkedin.com/in/george-njau>

Portfolio URL: <https://jijonjau.github.io/portfolio/>

PROFESSIONAL SUMMARY

Software Engineer experienced in delivering scalable and reliable applications across web, mobile and backend platforms. Proficient in API design, system integration and building end-to-end solutions, including transaction-driven and fintech-related systems. Adept at translating business requirements into efficient technical implementations, with a strong emphasis on performance, maintainability and user experience.

TECHNICAL SKILLS

Programming languages: Java, TypeScript, JavaScript, Python

Frontend: Next.js, React, Tailwind CSS

Backend: Spring Boot, REST APIs, JPA/Hibernate

Database: PostgreSQL / MySQL, Mongo DB

Tools & Platforms: Git, GitHub, Postman, Docker, AWS, Redis, Figma, Playwright

Concepts: System Architecture Design, API Design, Authentication, State and File Handling

WORK EXPERIENCE

Software Engineer

Company Name: Neostream Technology Group

Started as an intern (May 2022) • Promoted to Software Engineer

May 2022 – April 2026

- Designed and developed scalable features across web, mobile and backend systems.
- Built and maintained RESTful APIs to support cross-platform applications and integrations.
- Contributed to system architecture and data modeling for complex, transaction-driven workflows.
- Integrated third-party services, including payment and external system APIs.
- Implemented efficient data handling, validation and file management processes.
- Collaborated across teams to ensure seamless user experience and consistent data flow.
- Improved system reliability and performance through proactive debugging and optimization.
- Participated in code reviews, testing and continuous improvement of software development practices.

PROJECTS

Tours & Travel Booking Platform (web, backend & mobile)

- Participated in development of a full-stack booking platform supporting multiple services such as flights and vehicle bookings and user workflows.
- Participated in designing and implementation of backend architecture to manage diverse booking flows within a unified system
- Built responsive and dynamic user interfaces for booking, billing and document handling.
- Handled API integrations, validation logic and transaction handling across the platform.
- Contributed to both frontend and backend components, ensuring seamless system interaction.
- **TECH STACK:** Next.js, React, Java, Spring Boot, JPA, MySQL

Tap-to-Phone Payment Platform (Web Portal & mobile app)

- Contributed to the development of a web and mobile based payment solution enabling contactless transaction workflows.
- Built responsive and user-friendly interfaces for transaction processing and user interaction.
- Integrated frontend components with backend services to support real-time operations.
- Focused on performance, usability and consistency across different devices.
- **TECH STACK:** React.js, Tailwind CSS

KCB Mobigrow Project (web portal)

- Developed frontend features for an agricultural-financial services platform supporting customer onboarding and transactions.
- Built reusable UI components and ensured responsive design across devices.
- Integrated APIs and handled data presentation for dynamic, data-driven interfaces.
- Collaborated with backend teams to ensure accurate and efficient data flow.
- **TECH STACK:** React.js, Tailwind CSS

EDUCATION

Bachelor of Science in Computer Science

Multimedia University of Kenya

Year of completion: 2025

Grade: First class honors, certificate of excellence award

CERTIFICATIONS

- AWS Certified AI/ML Practitioner
- Cisco Networking Academy – Cybersecurity

ADDITIONAL INFORMATION

- Strong problem-solving and debugging skills.
- Experience working with both frontend and backend systems.
- Comfortable working with APIs across web and mobile platforms.
